

Incidents & Points

Do you know how much unexcused absenteeism is costing your business?

The Incidents & Points module for Attendance on Demand alerts you to employees whose absences are costing you... in terms of money, lost productivity, and employee morale. The Incidents & Points module accurately identifies attendance trends and helps you enforce absence management policies.

Encourage Good Attendance Habits

Points are assigned to specific attendance incidents such as tardy, early departure, unscheduled leave and others. Real-time point calculations are based on your organization's HR policies for fair and accurate enforcement. Points can also be used to reward conscientious employees and notify managers when positive events occur. You can satisfy management requirements and immediately inform employees, automatically and impartially.

Manage Points Directly on the Time Card

The Incidents & Points module is fully integrated with Attendance on Demand so points can be seen directly on the time card. Time card edits result in real-time point adjustments. Managers can override an automatically triggered event to account for special circumstances. It instantly records warnings and notifications in the employee record. Incidents and trigger actions automatically become a part of the employee's time card and historical attendance records and are available in a variety of reports.

Absent employees cost me money in overtime. Attendance on Demand made it easy to see that absent employees were costing me real money. Now employees earn points for absences and are automatically disciplined after five points. Absenteeism has decreased dramatically and so has my overtime cost.
