

What is a Web-Hosted Solution?

“ Why buy the cow, ” as the old adage goes, “when all you need is the milk?” More than ever, organizations are in need of effective solutions that can be implemented in weeks rather than months. Even for large corporations, being able to use “pay-as-you-go” technology that is leading edge rather than buy it is a better decision. Why buy an application, place it on in-house servers(or worse yet, buy dedicated servers!) need additional licensing and have all of those deployment issues?. Instead Attendance On Demand handles all of those issues for your organization. Running on state of the art servers, Attendance on Demand delivers a state of the art application via the internet.

Picture of cloud.

In today’s “lean” business environment, an organization needs a solution that grows (and contracts) with their company’s needs. Having PeopleForce Solutions provide you with a hosted solution means your company can have access to an industry leader in Time and Attendance technology with expenses that fit your business, regardless of your company’s business cycle. Lower upfront investment, no licensing costs, and no need to buy servers lowers the total cost of ownership. All you need is Internet connectivity to begin realizing the advantages of Attendance on Demand!
